

Local testing solutions with a global reach

We, at Sogeti, understand the importance of getting maximum business value from your IT systems. We offer a full range of testing & QA solutions delivered onshore and offshore, providing the reassurance that a business can achieve its IT goals. Our specialist testing expertise reduces the risk of IT failures, improving the quality of deliverables and time to market, and ensuring the delivery of the business' expectations.

Testing solutions that deliver results

As the largest testing service provider in Europe and the US, with over 2,500 testing experts in 14 countries, Sogeti helps organizations improve their testing and QA performance.

Sogeti's comprehensive range of software testing solutions – from outsourced testing service centers to test process improvements – help a client to increase financial control and reduce risk. Our key testing services are:

Managed Testing Services

Sogeti's proven sourcing approach, taking full responsibility for testing and QA activities, tailored to clients' needs.

TMap®-based Project and Program Testing

World leading business-driven, risk-based structured software testing.

TPI®-based Test Process Improvement

The tried and tested industry standard for assessing and improving your testing maturity and processes.

Specialist capabilities

In addition, we have developed specialist experience and skills in SAP Testing, SOA Testing, Test Automation, High Tech Testing and Infrastructure Testing.

We bring experience to an assignment which means projects run more smoothly from day one; and we share our skills and knowledge with clients to their benefit. Our testers are dedicated, trained and committed – not developers on the bench.

Expertise focused on key industries

Working closely with clients to design, develop and implement flexible solutions that address the unique needs of their business and industry, we have in-depth sector expertise and close relationships with over 800 clients worldwide including many blue-chip companies. This industry knowledge is at the heart of our expertise. We have specialist skills in major industries notably: financial services, government and agencies, telecommunications and utilities as well as aerospace and defense.

Why Sogeti?

There are many reasons for choosing Sogeti as your testing and QA partner.

Proven client benefits

Significant strategic and operations cost savings, improved time to market, greater control and enhanced software quality.

Strong delivery

All solutions are tailored to a client's requirements, delivered by the most appropriate combination of onshore, nearshore and offshore resources.

We take a business-driven, risk-based approach

Our clients' business issues come first. We take a big picture approach. Testing is part of the overall QA roadmap – ensuring that essential business, as well as technical, risks are addressed, and requirements delivered.

We focus on client satisfaction

Early in every engagement, together with our clients, we define SLAs on the project outcome and then use our customer approval assessment to validate client satisfaction on a project by project basis.

Sogeti is committed to testing

We have been specialists in testing for over 35 years in Europe and the US, with dedicated resources and test entities, onshore and offshore.

Innovative 'best in breed' open testing frameworks

Our cornerstone framework is TMap®, the de facto world standard for structured testing for over 15 years.

We are thought leaders

Demonstrated by the large number of specialist publications we have written on testing and QA, read by practitioner and theoretician alike.

Industry partners

Our pre-eminent position in the world of testing is demonstrated by our industry alliances and partners.

Our major partners within the testing and QA area are:

About Sogeti Group

SOGETI Group (member of the Capgemini Group), leader in IT services and R&D outsourcing, offers a range of local professional services in High Tech Consulting and Information Technology for large companies through these three complementary areas:
